What is i-Pals WEB

i-Pals is a photovoltaic business support software which is developed by Nippon Control System.

i-Pals stands for industrial Photovoltaic Auto Layout System. This service started as Windows application in 2012 and used by module manufacture company, EPC, engineering company and so on.

i-Pals WEB has following features.

Any device, anywhere and anytime

- You can use i-Pals WEB with a tablet, PC. I-Pals WEB does not require a specific OS or device.

User friendly operation

- The operation flow is shown in the application.
- For the beginners, all the detailed setting has already set as default setting.

High quality and detailed design functions

- The popular functions are converted to WEB version.
- Ex) Auto layout, auto string, shadow diagram

For both beginner and expert

- We adopt “Circle on point” system.
- We prepare default electrical items to get used to the system.

i-Pals is an all-in-one application for sales, designing and estimation.

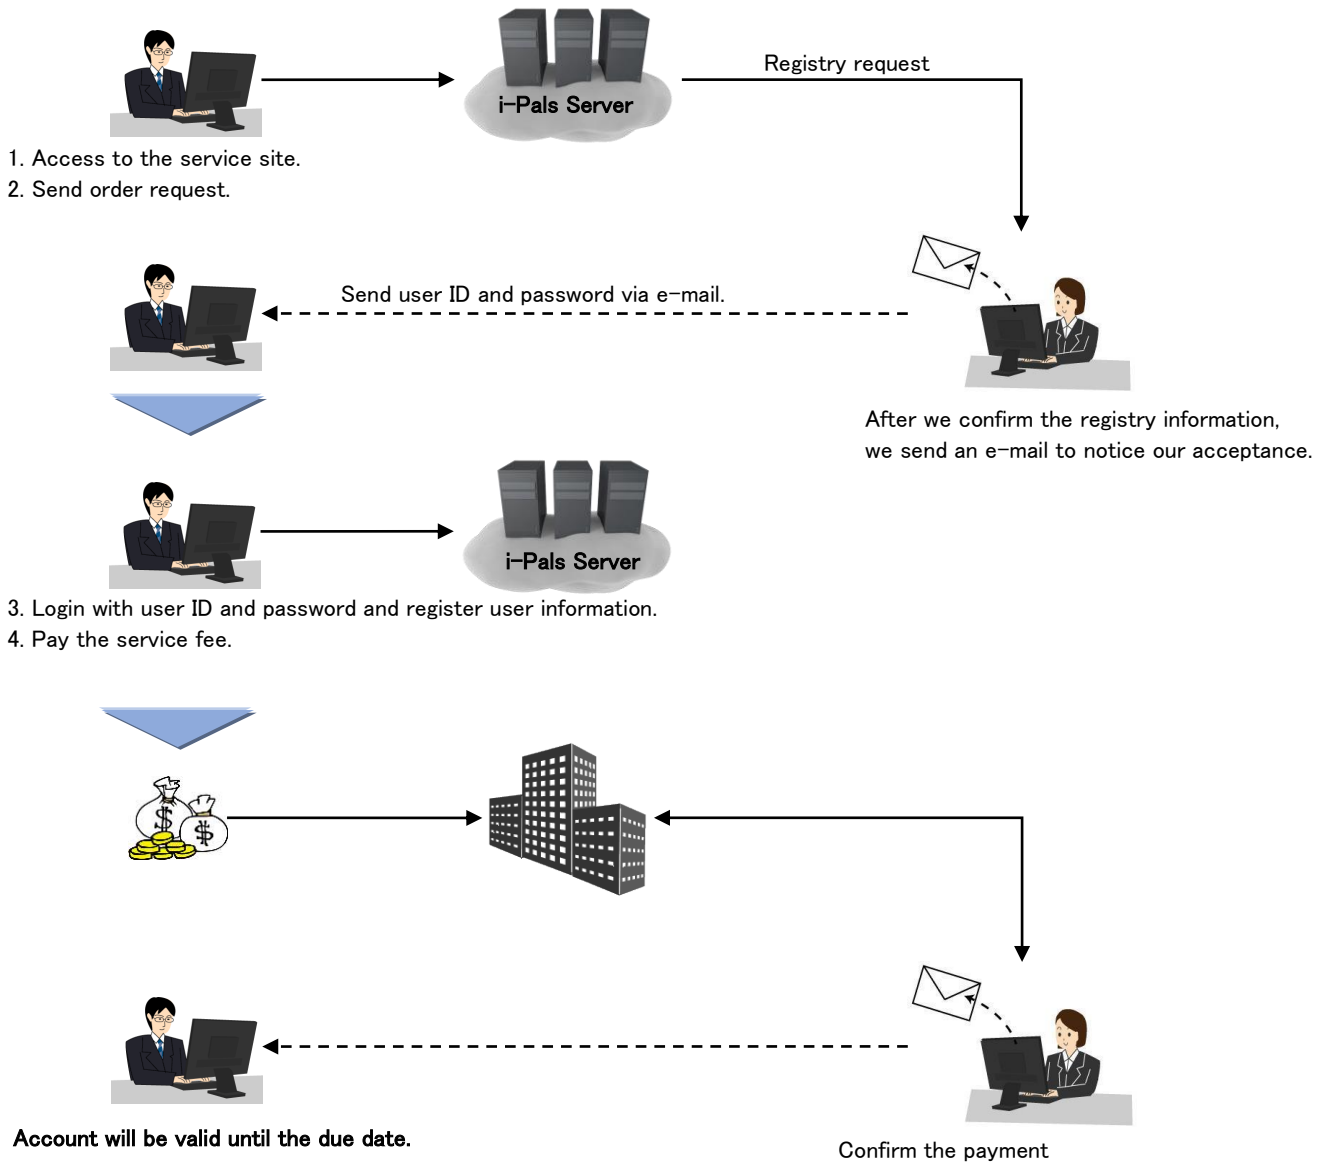

- You need only i-Pals for sales, design and estimate
- You can manage all projects on the server.
- It is easy to share the project between sales, designing stuffs and estimate stuffs.
